(54) Title: PROJECTION APPARATUS AND IMAGE ACQUISITION METHOD

(57) Abstract: A projector (1) is provided with a digital camera section (16) and is constructed in such a way that a memory card (4) is attachable to and detachable from the projector. During projection of a document, the image of a screen (S) in a document-projected state is picked up in accordance with an image pickup operation, done by a user, to thereby acquire a document image (G1) after which the image of the screen (S) in a non-projection state where projection of the document is stopped is picked up to thereby acquire a handwritten information image (G2) which reflects only handwritten information directly written on the screen (S). Both images (G1, G2) are recorded in the memory card (4) in association with each other by a predetermined method. With the memory card (4) attached to a personal computer or the like, the handwritten information image (G2) can be used on the personal computer. At that time, by checking the associated document image (G1), it is possible to discriminate to which document (or document page) the handwritten information reflected on the handwritten information image (G2) corresponds.

* Special categories of cited documents :

- *A* document defining the general state of the art which is not considered to be of particular relevance
- *E* earlier document but published on or after the international filing date
- *L* document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)
- *O* document referring to an oral disclosure, use, exhibition or other means
- *P* document published prior to the international filing date but later than the priority date claimed

- *T* later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention
- *X* document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone
- *Y* document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art.
- *G* document member of the same patent family
